

Greeting Fellow Club Members,

As you know, the club is working toward installing a miniature runway for our smaller type RC aircraft. Currently, the small narrow strip that we have is too small for most of our smaller RC aircraft flying needs. Bill Berry and Dan Moorehead have been working up the costs and materials for this runway. Dan has found a cheaper plastic underlayment. Here is the cost break-down:

- \$800.00 for Runway fabric
- \$30.00 for Sand
- \$117.00 for Plastic
- \$293.00 for delivery
- \$50.00 rental for dump-trailer

Total Cost: \$1290.00

If we can get a runway improvement grant from AMA, they will pay \$322.00 which will leave the club paying a total of \$968.00. Keep in mind that the grant from AMA is not guaranteed, so we could end up covering the total cost.

We are asking that every club member pay an extra 35.00 for dues this year to help the club cover the cost of this project. That would mean every club member would pay \$70.00 instead of the normal \$35.00. We ask that you respond to this email with a Yes or No depending upon if you are in favor of helping the club pay for this or not.

Having this miniature runway for our smaller RC aircraft would be a great addition to our field and could attract new members. Please consider the one-time extra fee so that we can complete this project.

Please call one of the following to either to promote the project or reject it.

Joe: 304-482-4670

Larry: 304-483-7477

Sam: 304-615-1430

Bill: 740-525-3733

(IF NO ANSWER PLEASE LEAVE A MESSAGE)

Thanks

Your Club Officers.
